Q40: Chat GPT and Beyond - Revolutionising Education with Artificial Intelligence: Innovations and Opportunities

Date Wednesday 17 March 2023

Venue THE WESLEY LONDON EUSTON, NW1 2EZ

Cost £229 (non-IAPS members - £329)

Chat GPT and Beyond - Revolutionising Education with Artificial Intelligence: Innovations and Opportunities explores the potential of AI in transforming the education landscape. Led by expert educators and featuring special guest Priya Lakhani OBE, participants will gain a deeper understanding of the opportunities and challenges that 'generative AI' such as Chat GPT, GPT-4 and other tools present for teaching and learning as well as practical applications for the schools of today as they prepare the thinkers and leaders of tomorrow.

Through a combination of lectures, case studies, and interactive breakout sessions, this course will provide educators with the skills and knowledge they need to successfully integrate AI into their teaching practice. You'll learn about the latest AI innovations in education and gain practical experience using and planning for the application of AI tools and techniques to create engaging and personalised learning experiences for your students as well as more efficient working practices for your staff.

Whether you're a classroom teacher, education leader, or EdTech entrepreneur, this course will help you stay at the forefront of the rapidly evolving field of AI in education. Join us and discover how AI can revolutionise the way we teach and learn and unlock new opportunities for student success in a dynamic and ever-evolving education sector.

Audience heads, deputy heads, director of studies, governors, SMT, teachers of computing, heads of department

Objectives This course is designed to introduce educators, administrators, and policymakers to the potential of artificial intelligence in the field of education. Over the duration of the course, participants will hear from leading figures in the field of artificial intelligence and education innovation as we explore the latest trends and developments in AI technology and its applications in various educational settings. Topics covered will include intelligent tutoring systems, adaptive learning platforms, personalised learning environments, and other innovative tools that can enhance the quality of education and improve student outcomes. The course will also delve into the ethical and practical considerations that must be addressed when implementing AI in education, such as data privacy, bias, and transparency. There also will be opportunities to discuss the practical and ethical issues in workshops and group sessions. By the end of the course, participants will have gained a comprehensive understanding of the opportunities and challenges presented by AI in education and be equipped with the knowledge and skills
