

Sarah Horrocks

Sarah has significant experience of leading powerful professional development for teachers, supporting schools in using digital technologies and working with school and other education leaders to develop their digital strategies.

She has a proven track record of delivering successful and impactful large-scale education projects, including the [Learning Bridges](#) remote learning technology solution for UNICEF in Jordan for one million children, [TechPathways London](#) for the London Mayor's Digital Talent programme, [BlendEd](#), a blended learning pedagogy professional development programme commissioned by IBM, and leading the Connected Learning Centre as its director for 16 years. She has worked with municipalities across Northern Europe devising and delivering a range of digital learning-themed Erasmus projects including AI and personalised learning, computational thinking and blended learning pedagogy. She has led the delivery of [multi-award-winning](#) curriculum and technical services for schools. She is an experienced public speaker on digital learning and presents regularly at the BETT show.

Sarah has authored several research papers including [educational blogs and their effects on pupils' writing](#) and [technology-supported professional development for teachers](#): lessons from developing countries. She is a guest lecturer at UCL, Institute of Education.
